ANTHROPOLOGY AND GLOBAL HEALTH**

MÁSTER OFICIAL SEMIPRESENCIAL DE 120 ECTS

25

UNIVERSITAT
ROVIRA I VIRGILI

UNIVERSITAT DE
BARCELONA

IMF CSIC

This inter-university master's degree with Universitat de Barcelona is the continuation of the URV-specific degree in Anthropology of Medicine (1994-2000), and the Master's Degree in Medical Anthropology and Global Health (2006-2014). It is considered the best master's degree, taught in Spanish language, in Europe and Latin America because of the quality of its professors and the research done.

Its aim is to provide students with a solid foundation in the theories, techniques and methodologies of medical anthropology. On graduating they should be able to translate social problems into anthropological research questions and transform the research into practical policies, thus contributing to social innovation and new health care models.

This two-year program is unique in southern Europe, and constitutes a link between Europe, Latin America and African countries. The languages of instruction are Spanish and Catalan; some required reading in English.

CAREER OPPORTUNITIES

Graduates in Inter-university Master's Degree in Medical Anthropology and Global Health are trained to join the labour market in the following areas:

- Public and private agencies that provide assessment in the health sector
- International health, health promotion and education, and public health
- Teaching the sociology of health at universities and other institutions
- Health management and planning
- Cultural psychiatry and psychology
- Gerontology and age
- International health intervention
- Health in the environmental field
- High-level international research into global health
